

SimpleFrame Platform — Privacy Notice

Effective Date: 10/06/2025

Copyright © 2025 Christopher Samples. All Rights Reserved.

This version supersedes prior versions.

1 • Purpose

This Privacy Notice explains what limited data is collected when you access or use the **SimpleFrame Platform** and its APIs (“Services”), how that data is used, and your associated rights.

2 • Philosophy

SimpleFrame is designed according to a *minimal-retention principle*.

The system does **not** harvest personal data, build profiles, or sell any information to third parties. Transient operational data is processed only to keep the Services secure and functioning.

3 • Information Collected

1. **Operational Logs** – basic request metadata such as:

- date/time of request,
- API route or function invoked,
- response size and latency,
- hashed or pseudonymous user/account ID for rate-limit tracking.

Purpose: security auditing, performance tuning, abuse detection.

2. **Account Information (if applicable)** – if you register for access:

- email address, display name, and authentication credentials (hashed).

Purpose: account verification and access control.

3. **Content You Send** – any text or data you voluntarily submit to the API for processing.

Retention: stored only temporarily in memory or short-term logs required for operation, then automatically deleted or anonymized.

Recommendation: do not send personal, confidential, or regulated data.

4. **Cookies / Session Tokens** – only essential cookies or session identifiers used for authentication and CSRF protection.

No tracking or advertising cookies are used.

4 • Data Retention and Deletion

- Operational logs are typically retained for **no longer than 30 days**, unless required for security or legal compliance.

- Account data persists only while an account is active.
- You may request deletion of your account and associated data at any time by emailing **info@simpleframe.ai**.
- Backups and archived receipts are cryptographically hashed and do not contain readable personal information.

5 • Data Sharing

Data is **not sold, rented, or shared** with third parties.

Information may be disclosed only when:

- required by applicable law or court order;
- necessary to investigate misuse or enforce Terms of Use; or
- explicitly authorized by the user.

All processing occurs within secure infrastructure under the control of the copyright holder or authorized providers.

6 • Where Data Lives

Receipts and snapshots are stored off-chain by default. If we add optional content addressing or federated storage later, we will document it here and in the product.

7 • Security Practices

- Encrypted transport (HTTPS / TLS).
- Access controls and role-based permissions.
- Audit logs for all administrative actions.
- Regular patching and vulnerability review.

Despite these precautions, no online service can guarantee absolute security; users accept this inherent risk.

8 • Third-Party Services

If any third-party providers (e.g., cloud hosting, payment processors, email systems) are used, their privacy policies govern data handled within their systems.

Current providers will be listed here if applicable. [Add provider list when known.]

9 • Your Rights

Depending on jurisdiction, you may have rights to:

- access, correct, or delete your data;
- withdraw consent for processing;
- receive a copy of data you provided.

Requests can be sent to **info@simpleframe.ai**.

Responses will be made within a reasonable time as required by law.

10 • Choices & Telemetry

Your Choices.

- You may request **account deletion** and associated data removal (subject to legal/backup limits).
- Where available, you may **opt out of non-essential telemetry**.
- You may keep your work **off-chain and local by default**; only optional artifacts you explicitly share are stored.

11 • Children

The Services are not directed to children under 13. We do not knowingly collect personal information from children. If you believe a child has provided personal information, contact **info@SimpleFrame.ai** and we will delete it.

12 • Changes to This Notice

This Notice may be updated periodically.

Revisions take effect upon posting to the SimpleFrame website.

The “Effective Date” above reflects the most recent update.
